GORAN NAUMOSKI

AT A GLANCE

Software QA, 12 years
Test automation, 2 years
IT & telecom, 17 years
Available immediately
EU citizen, work rights
Remote or Sofia office

SKILLS

Automation
Playwright (TypeScript) framework, Selenium, Cucumber (BDD)
API testing
REST, SOAP, cXML, Postman, Swagger, WSDL
Data
MS SQL Server, IBM DB2, MySQL, MarkLogic
AI in QA
Claude Code, LLM assistants, agent workflows
Process
test strategy, QA audits, metrics, RCA, code review, coaching
Tooling
Jira, PractiTest, HP ALM, Git, TeamCity

SUMMARY

12 years in software QA, manual testing and quality engineering first, automation in TypeScript and Playwright for the last 2, on top of 5 years in telecom and network performance. 17 years in IT overall. Responsible for end-to-end quality on an enterprise asset-management and B2B e-commerce SaaS platform: test strategy, QA process standardisation, quality metrics, defect lifecycle and root cause analysis, acceptance testing with business stakeholders, API and SQL data validation, BDD and requirements traceability. Built an AI-augmented QA workflow with LLM assistants and a multi-agent orchestrator. Fluent English, EU citizen.

EXPERIENCE

Senior QA / QA Automation Engineer
Aug 2018 - Jul 2026
Xogito Group
Sofia (remote)
Enterprise asset-management and work-order SaaS platform; B2B e-commerce and ERP integrations

- Verified a client's migration from a legacy desktop platform for medical-equipment sales and service to web: defined the expected behaviour from the old system and checked the new one against it flow by flow.
- Responsible for end-to-end quality across an enterprise asset-management and B2B e-commerce SaaS platform, test strategy, release scope and coverage across UI, APIs and databases.
- Standardised test cases with SQL-backed preconditions and Jira-to-test traceability; defined the quality metrics and release reporting used in sprint decisions; reviewed test code, mentored and trained colleagues on test design.
- Built the Playwright (TypeScript) test framework: page-object layer, shared configuration, cross-browser specs with tracing, CI-ready setup and test reporting.
- Built API and integration suites for cXML 1.2 punchout flows across ERP integrations (Postman/Newman), validating protocol-level responses and schemas; validated SQL data across MS SQL Server and IBM DB2.
- Built an AI-augmented QA workflow, orchestrator plus specialist agents for test authoring, API testing, database querying and reporting; every AI-generated artefact reviewed.

QA Engineer
Sep 2014 - Jul 2018
Luxoft
Sofia
Banking and financial software development

- Defined the test strategy for integration testing of web-based banking applications, working directly with clients and configuration managers.
- Designed test scenarios, plans and regression plans; automated end-to-end tests with Selenium and Cucumber/Gherkin (BDD); tested APIs with SOAP UI and validated large datasets in MarkLogic.

Test Engineer
Jan 2013 - Sep 2014
Comptel Corporation
Sofia
Telecommunications software

- Designed test cases and plans from system requirements; prepared environments and test data; executed, reported and prioritised fixes with developers.

Project Manager / Network Performance Analyst
Jun 2010 - Dec 2012
Alcatel-Lucent
Sofia

- Managed the IPTV Vivacom project and MAN/ADSL upgrade: scope, budget, risk and reporting for a programme of 100+ people. Automated network-performance reporting.

Earlier: VIVACOM / TeleLink, Sofia (2009 - 2010): network performance, helpdesk and integration support

EDUCATION & CERTIFICATIONS

M.Sc., Telecommunications Networks · Technical University of Sofia 2008 - 2010
B.Sc., Telecommunications · Technical University of Sofia 2004 - 2008
Certified Associate in Project Management (CAPM) · PMI
